Regarding the Coronavirus Disease (COVID-19)

Hello members,

You are all important, not only to the CPCA, but to your family, friends, co-workers and your clients. It is important that you be safe.

If you are planning on continuing at your office, please post a notice stating that if your client presents with any symptoms, including a common cold, you will gladly rebook for them. Please ensure you have wipes, hand sanitizer, and perhaps a Lysol spray in your office. Keep social distance from your clients.

If you are trained in online or telephonic counselling, then you may suggest moving your clients to one of these forums.

If you feel you have symptoms, call 811 immediately.

The World Health Organization, (WHO) has information on staying healthy:
