

Professional Development criteria:

Professionally relevant development of Self specific to authentic and effective engagement in providing mental health services is essential for all clinicians.

The following is a description of types of Professional Development currently acceptable to satisfy annual requirements:

Learning or instruction in counselling, counselling psychology, psychology, or psychotherapy theory and/or research; therapeutic modalities; clinical techniques, interventions, or strategies for implementation in the therapy session; structured program for certification in a therapeutic specialty (Example: EMDR, DBT, EFT, Sand tray, etc.)

- ★ All Registered (RPC) and Master Members (MPCC, MPCC-S) must meet the requirement of a minimum 12 hours of professional development (PD) to meet renewal criteria and remain in good standing.
- ★ Candidate Members do not require professional development credits as they are currently under supervision.
- ★ Students do not require professional development credits as they are still completing their education.
